WORK EXPERIENCE

Senior Front-End Developer

Medical Solutions, Remote

3/2023 – current

- Help direct, maintain, and grow custom component libraries
- Lead front-end development of client-facing ReactJS web application
- Collaborate closely with product, design, QA, and back-end teams to ensure all requirements are met and delivered on time
- Find and implement efforts to improve code quality, structure, speed, and test coverage

Senior Front-End Developer

Gutcheck, Denver CO

7/2019 – 1/2023

- Coordinate with product, back-end, and QA to ensure projects are delivered on-time
- Create and maintain a series of greenfield React/NextJS apps that automate and facilitate previously time-intensive internal tasks
- Create and maintain suite of Cypress and Jest tests
- Create and maintain various Lambda functions that generate client deliverable documents containing charts, tables, and other assets

Lead Front-End Developer

Ping Identity, Denver CO

4/2014 – 6/2019

- Create and maintain a library of custom React components used across multiple client-facing web applications
- Coordinated with designers to harden component designs and UI
- Manage incoming features, requests, and bug requests among a small team of front-end developers

Front-End Developer

Yahoo! Inc (acquired Associated Content), Denver CO

5/2010 – 3/2014

- Work with designers and back-end engineers to prototype and code various front-end JavaScript based web applications
- Work with UI team to architect user workflows and interactions
- Create and improve site design language and patterns

Front-End Developer

Associated Content, Denver CO

2/2010 – 5/2010

- Coordinate with team to create new user workflows and experiences
- Work with UX designers to harden new designs and experiences
- Build out front-end pages using JavaScript and CSS
